### SECTION 7 - DUTY OF DISCLOSURE AND DECLARATION

### Read this section carefully before signing.

### **DUTY OF DISCLOSURE**

### **Insurance Contracts Act 1984**

Before you enter into a contract of life insurance with an insurer, you have a duty under the *Insurance Contracts Act 1984*, to disclose to the insurer every matter that you know, or could reasonably be expected to know which is relevant to the insurer's decision whether to accept the risk of the insurance and, if so, on what terms.

You have the same duty to disclose those matters to the insurer before such a contract of life insurance is extended, varied or reinstated.

Your duty, however, does not require a disclosure of a matter:

- That diminishes the risk to be undertaken by the insurer;
- That is of common knowledge;
- That your insurer knows or, in the ordinary course of business, ought to know;
- For which your duty of compliance is waived by the insurer.

#### Non-disclosure

If you fail to comply with your Duty of Disclosure and the insurer would not have entered into the contract on any terms if the failure had not occurred, the insurer may avoid the contract within three years of entering into it. If your non-disclosure is fraudulent, the insurer may avoid the contract at any time.

An insurer who is entitled to avoid a contract of life insurance may, within three years of entering into it, elect not to avoid it but reduce the sum that you have been insured for in accordance with a formula that takes into account the premium that would have been payable if you had disclosed all relevant matters to the insurer.

Your Duty of Disclosure continues until the Contract of Life Insurance has been accepted by the insurer and confirmation in writing is issued. It also applies if you seek to extend, vary or reinstate the Contract.

#### DECLARATION

My decision to apply for insurance under MLC Group Insurance is based on the Product Disclosure Statement and/or Policy Document for the relevant product that I have received and my understanding of the information it contains.

### I understand and agree that:

- a. I have read the Duty of Disclosure set out on above. ### INFORMATION ABOUT THE HIV ANTIBODY BLOOD TEST

To fully assess this application for insurance, we may request you undergo an HIV antibody blood test. This test could be arranged through your own doctor, by consulting a doctor arranged by us or directly with the pathology laboratory. This test is completely voluntary. However, if you refuse the test, it could affect our willingness to accept this application.

Acquired Immune Deficiency Syndrome (AIDS) is a viral disease caused by the Human Immunodeficiency Virus (HIV) which destroys some of the white blood cells in our bodies. These white blood cells help protect our bodies against infection and cancers. Some people infected with HIV therefore suffer infections or cancers and, in some cases, direct damage to the brain by the virus. The most recent evidence suggests that the virus will persist in the body indefinitely. As yet, there is no cure for AIDS.

Following infection, there may be mild flu-like symptoms or no symptoms at all. The body subsequently manufactures antibodies to the virus, usually within 8 to 12 weeks, but occasionally longer. These antibodies can be detected by a blood test and this is the test proposed. The infected individual may remain free of symptoms for many years, but during this time may pass on the infection to others. The first symptoms may include weight loss, fever, swollen glands, diarrhoea, coughs, cancer or nervous system diseases.

### A positive result

If the result of the HIV antibody test is positive, this means:

- 1. You have been infected by HIV,
- 2. You can pass this infection:
  - (a) to any unprotected sexual partner,
  - (b) to anyone receiving your blood, donated organs or semen,
  - (c) if you are an intravenous drug user, to anyone sharing syringes or needles with you,
  - (d) if you are a woman, to a baby during pregnancy, and perhaps at birth or by breast feeding.

There is no evidence that the virus can be spread by other types of contact, such as touching, sharing eating utensils, coughing, sneezing or from mosquito bites.

3. Full AIDS is notifiable throughout Australia. In some States and Territories, HIV infection and other early stages of the disease are also notifiable to the health authority. In most cases, notification is by name and address, though in some States, it is by code.

- 4. Knowing that you are HIV antibody positive has legal consequences in all States and Territories, although they vary. It may exclude you from some jobs and from access to some services. It can be an offence to knowingly transmit the virus or put someone at risk of infection through sexual activity. There are quarantine provisions which may be used if the authorities consider it appropriate.
- 5. In many cases, the full effects of AIDS will develop at some stage and the long-term outlook is still uncertain. As a result, life and disability insurance is unlikely to be available to anyone infected with HIV.

If the result of the test is positive, it is important that you receive appropriate counselling from a doctor. You are asked to nominate your family doctor to give you this counselling in the consent declaration contained in the Application form, see Section 5. You may wish to nominate an alternative doctor. We will pass a positive result on to that doctor for onward communication to you.

### A negative result

If the result of the HIV antibody test is negative, this means, either that you have not been infected or that you have been infected recently but your body has not yet had time to manufacture antibodies. However, you should be alert to the risk of becoming infected and refrain from activities which make that possible — particularly unsafe sexual practices and sharing of syringes or needles.

### The choice is yours

You may choose not to have the test for a variety of reasons, eg you may feel you would not be able to cope with the knowledge of a positive result and the medical implications which follow, or you may be concerned about the social implications (discrimination, stigma, etc). You may feel that you would like more information first, in which case you are advised to seek advice from your own doctor. If you do not have one, or would prefer advice from elsewhere, you should see a specialist counsellor on the subject. Government and community organisations provide AIDS counselling services.

If you choose to have the test arranged by us, we are concerned to protect your privacy. The result will be sent under confidential cover to our Chief Medical Officer. A positive result will not be transferred to our general records on your application for insurance.
